

# 1230/1432/1632/1632RS

The agricultural tool that is at home anywhere on the farm.

The Model 1230, 1432 or 1632 Grader/Box Scraper is the perfect machine for the family farm or feedlot. With its standard-equipment fold-down box ends, one machine can be used for every job on the farm — including building ponds, cleaning ditches, rebuilding terraces, grading roads, moving snow, digging irrigation ditches, leveling fields, scraping feedlots or clearing brush.

The 3-way blade operation provides raise/lower, side-to-side tilt up to 15° and up to 45° of rotation for the optimum cutting position, no matter the job.

- A weight box over the axle holds approximately ½ yard of concrete (1632: 1,500 lbs.) for stability on slopes and against side-draft.
- A hydraulic cushion valve provides blade break-away for built-in protection upon solid impact.
- The standard-equipment, safety chain and lighting package provides added safety during transport.
- Category 3 Pintle Hitch and adjustable drop leg jack for simple one person hook-up.
